**Grid Ref:** Uses standard 2 letter, 6 number format;  
Two initial letters to identify a 100km square, then three digits  
from the easting's and three from the northing's. E.g. SE014887

**Lat / Long:** input the Latitude followed by a space then the  
Longitude. E.g. 53.044209 -1.817235
